17mm SPANNER	
RUBBER Mallet	

IMPORTANT

Ensure you are familiar with these instructions prior to commencing assembly.

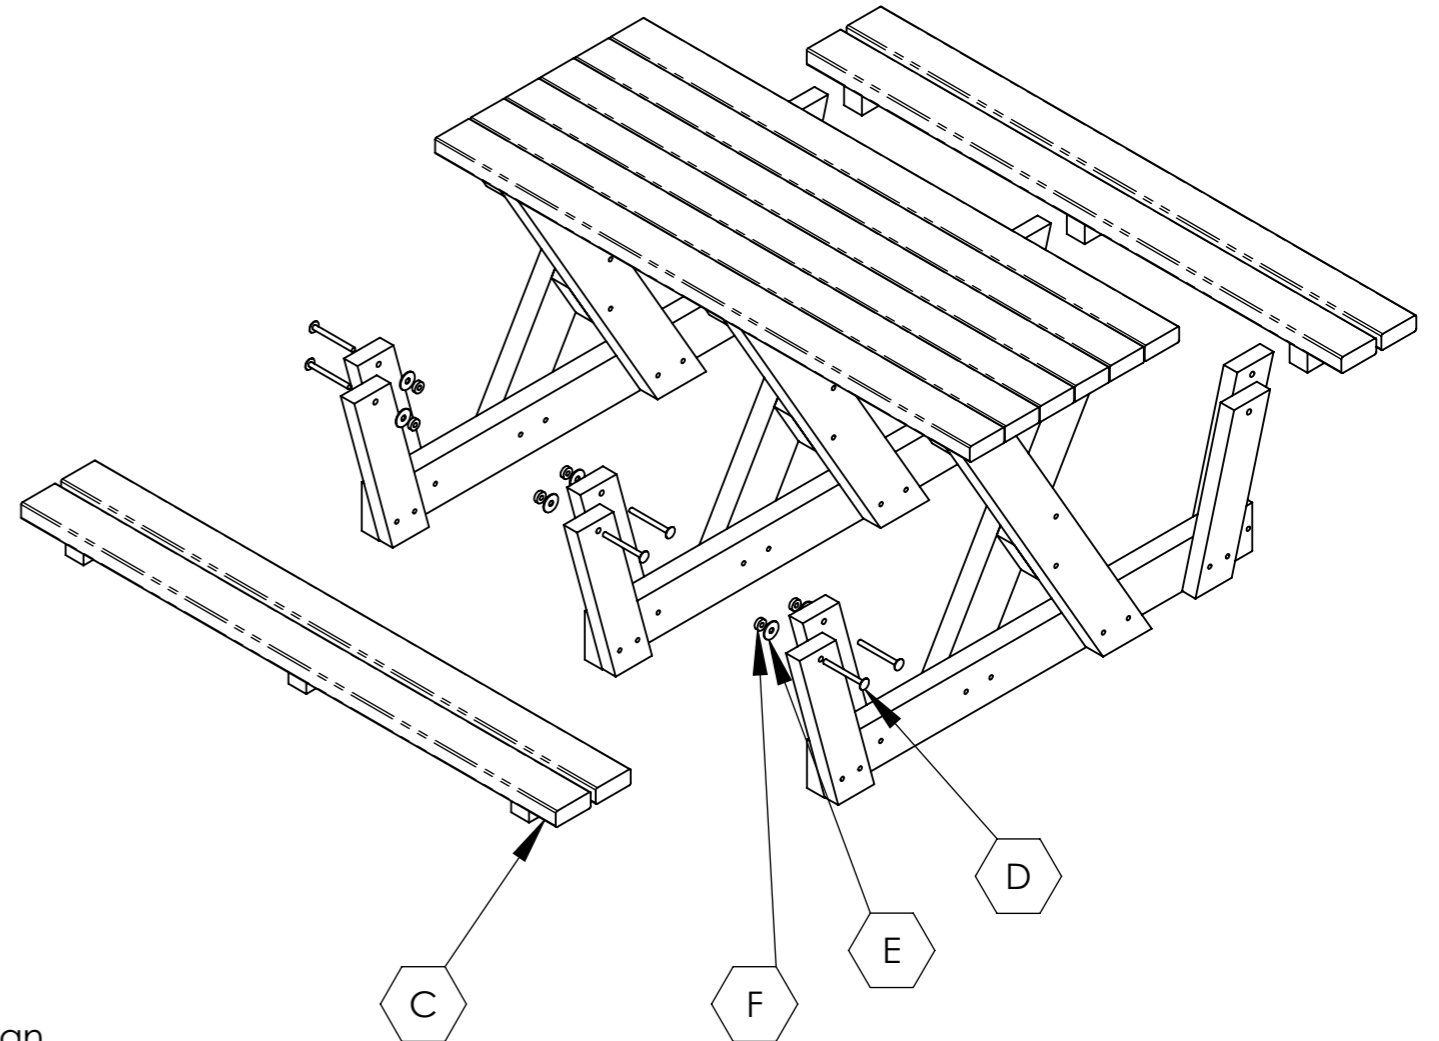

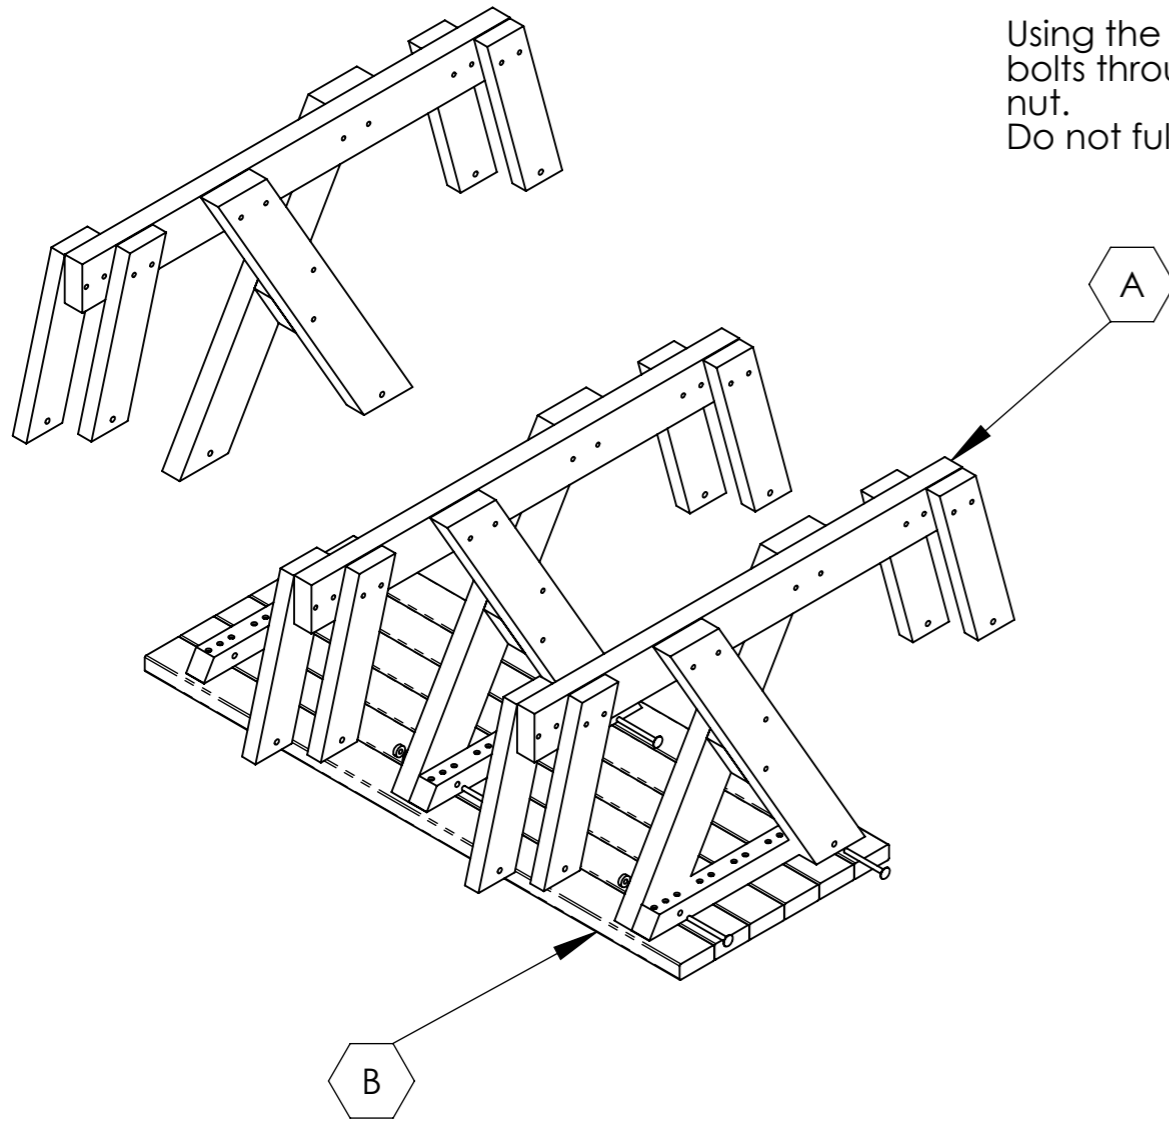

Employ correct lifting procedures when handling.

Lifting requires 2 people.

Begin assembly with the table top upside down on a smooth clean surface.

Lower the pre-assembled frames onto the table top assembly.

Using the supplied M10 x 110mm coach bolts. Fit the bolts through the table/leg hole with the washer and nut. Do not fully tighten at this stage.

Flip the table the correct way up.

Lower the pre-assembled bench onto the frame and align the holes on the bench blocks with the holes on the frames. Use the provided bolts to secure in place.

The nuts & bolts on the frame located at the base of the bench leg can be loosened to aid fitting.

Once both benches have been fitted all the nuts can be tightened, starting with the underside of the table top, then the benches.

Fit the caps provided on all bolt ends except for those under the bench assembly.

Note:
The benches have offset blocks. If the frame is protruding out further than the bench. Flip the bench assembly 180°
